

Claims:

1. (Previously Presented) A silver alloy for use in a reflection coating for an optical recording medium, consisting of silver and, as additive elements, indium and tin as additive elements, wherein said additive elements have a concentration of 0.1-0.5 wt% in said silver alloy.
- 2-4. (Canceled.)
5. (Previously Presented) A silver alloy for use in a reflection coating for an optical recording medium according to claim 1, wherein the indium and/or tin as an additive element has been internally oxidized partially or wholly.
6. (Previously Presented) A sputtering target comprising the silver alloy according to claim 1.
7. (Previously Presented) An optical recording medium having a reflection coating consisting of the silver alloy according to claim 1.
8. (Previously Presented) A sputtering target comprising the silver alloy according to claim 5.
